# CMHD Pathology Report

### Principle Investigator: Dr. Jacqui White

Institute: Wellcome Trust Sanger Institute Address: Attn: Linda Read Wellcome Trust Genome Campus Hinxton Cambridge CB10 1SA, UK

ReportID: Report Date: January 08, 2014 email:

Pathologist: Dr. H. Adissu

### **Mouse Genetics Project**

Wellcome Trust Sanger Institute Wellcome Trust Genome Campus Hinxton, Cambridge **CB10 1SA** UK

MGPenguiries@sanger.ac.uk Mouse Portal

Europhenome

CMHD LabID: N13-710

### **Relevant History:**

decreased circulating triglyceride level decreased circulating cholesterol level increased susceptibility to bacterial infection

# AnimalID: M01058784 (Male)

# **Histopathology Findings:**

eye (MA:0000261)

### **Histopath Description:**

Involving one eye, there are clusters of external nuclear structures within the internal plexiform

### **Morphological Diagnosis:**

Distribution: multifocal; Severity: mild; MPATH Process Term: developmental dysplasia MPATH:64

### **Definitive Diagnosis:**

Retinal dysplasia

### thymus (MA:0000142)

# **Histopath Description:**

There are two 50 um diamater epithelial cysts.

## **Morphological Diagnosis:**

Distribution: multifocal; MPATH Diagnosis: cyst MPATH:62; MPATH Process Term: developmental and structural abnormality MPATH:55

### **Definitive Diagnosis:**

Epithelial cyst

# **Histopathology Comments:**

This is a developmental abnormality commonly seen in mice.

### Organ/Tissue Analyzed:

Histopathology examination included the following organs and tissues: brain, trigeminal ganglion, eyes, salivary glands, trachea, lungs, heart, thymus, thyroid gland, parathyroid gland, exocrine and endocrine pancreas, oesophagus, stomach, small intestine, large intestine, liver, gall bladder, spleen, kidneys, adrenal gland, lymph nodes, spinal cord, bone marrow, sternum, femur and tibia with associated skeletal muscles, brown fat, pinna, skin, testis, epididymis, seminal vesicle, and prostate.

# AnimalID: M01120616 (Male) **Histopathology Findings:**

liver (MA:0000358)

### **Histopath Description:**

There is a focal aggregates of inflammatory cells centered on necrotic and regenerative hepatocytes

#### Morphological Diagnosis:

Distribution: Multifocal; Severity: mild; MPATH Diagnosis: inflammation MPATH:212; MPATH

Process Term: inflammation MPATH:212

## **Definitive Diagnosis:**

Inflammatory cell aggregates

# **Histopathology Comments:**

This is a common finding in lab mice and is attributed to inflammation from bacterial showering from the portal circulation.

### lung (MA:0000415)

### **Histopath Description:**

There are occasional perivascular lymphoid aggregates

# **Morphological Diagnosis:**

**Distribution:** multifocal; **Severity:** mild; **MPATH Process Term:** inflammation MPATH:212

### **Definitive Diagnosis:**

Perivascular lymphoid aggregates

### **Histopathology Comments:**

The lesion suggests antigenic stimulation of hematogenous origin

#### Organ/Tissue Analyzed:

Histopathology examination included the following organs and tissues: brain, trigeminal ganglion, eyes, salivary glands, trachea, lungs, heart, thymus, thyroid gland, parathyroid gland, exocrine and endocrine pancreas, oesophagus, stomach, small intestine, large intestine, liver, gall bladder, spleen, kidneys, adrenal gland, lymph nodes, spinal cord, bone marrow, sternum, femur and tibia with associated skeletal muscles, brown fat, pinna, skin, testis, epididymis, seminal vesicle, and prostate.

### AnimalID: M01145367 (Female)

### **Histopathology Findings:**

### lung (MA:0000415)

### **Histopath Description:**

There are occasional perivascular lymphoid aggregates

# **Morphological Diagnosis:**

Distribution: multifocal; Severity: mild; MPATH Process Term: inflammation MPATH:212

### **Definitive Diagnosis:**

Perivascular lymphoid aggregates

#### **Histopathology Comments:**

The lesion suggests antigenic stimulation of hematogenous origin

# eye (MA:0000261)

### **Histopath Description:**

Involving one eye, there are clusters of external nuclear structures within the internal plexiform layer.

### **Morphological Diagnosis:**

**Distribution:** multifocal; **Severity:** mild; **MPATH Process Term:** developmental dysplasia

### **Definitive Diagnosis:**

Retinal dysplasia

### lung (MA:0000415)

# **Histopath Description:**

There is a focal perivascular aggregates of mononuclear inflammatory cells in the lung.

### **Morphological Diagnosis:**

**Duration:** Chronic; **Distribution:** focal; **Severity:** mild; **MPATH Diagnosis:** inflammation MPATH:212; **MPATH Process Term:** inflammation MPATH:212

# **Definitive Diagnosis:**

Perivascular inflammatory aggregates

# **Histopathology Comments:**

This lesion is suggestive of antigenic stimulation of hematogenous origin. It is a common and insignificant incidental finding.

### thymus (MA:0000142)

### **Histopath Description:**

There are two 50 um diamater epithelial cysts.

#### **Morphological Diagnosis:**

**Distribution:** multifocal; **MPATH Diagnosis:** cyst MPATH:62; **MPATH Process Term:** developmental and structural abnormality MPATH:55

#### **Definitive Diagnosis:**

Epithelial cyst

### **Histopathology Comments:**

This is a developmental abnormality commonly seen in mice.

### lymph node (MA:0000139)

### **Histopath Description:**

The mesenteric lymph node is markedly enlarged (greater than four fold). The medulla is particularly expanded by chords and sheets of plasmatoid cells. There are promient germinal centers within the medulla

# **Morphological Diagnosis:**

Distribution: Diffuse; Severity: moderate; MPATH Diagnosis: hyperplasia MPATH:134; MPATH Process Term: hyperplasia MPATH:134

# **Definitive Diagnosis:**

Lymphoid hyperplasia

## **Histopathology Comments:**

The changes in the mesenteric lymph node are suggestive of draining of a regional inflammatory process. However, such a process was not observed in the tissues examined. Early maginal center lymphoma is suspected.

### Organ/Tissue Analyzed:

Histopathology examination included the following organs and tissues: brain, trigeminal ganglion, eyes, salivary glands, trachea, lungs, heart, thymus, thyroid gland, parathyroid gland, exocrine and endocrine pancreas, oesophagus, stomach, small intestine, large intestine, liver, gall bladder, spleen, kidneys, adrenal gland, lymph nodes, spinal cord, bone marrow, sternum, femur and tibia with associated skeletal muscles, brown fat, pinna, skin, uterus, oviduct, and ovary, and mammary gland.

### AnimalID: M01054072 (Female)

## **Histopathology Findings:**

### lymph node (MA:0000139)

#### **Histopath Description:**

The mesenteric lymph node is markedly enlarged (greater than four fold). The medulla is particularly expanded by chords and sheets of plasmatoid cells. There are promient germinal centers within the medulla

## **Morphological Diagnosis:**

**Distribution:** Diffuse; **Severity:** moderate; **MPATH Diagnosis:** hyperplasia MPATH:134; **MPATH Process Term:** hyperplasia MPATH:134

#### **Definitive Diagnosis:**

Lymphoid hyperplasia

# **Histopathology Comments:**

The changes in the mesenteric lymph node are suggestive of draining of a regional inflammatory process. However, such a process was not observed in the tissues examined. Early maginal center lymphoma is suspected.

#### Organ/Tissue Analyzed:

Histopathology examination included the following organs and tissues: brain, trigeminal ganglion, eyes, salivary glands, trachea, lungs, heart, thymus, thyroid gland, parathyroid gland, exocrine and endocrine pancreas, oesophagus, stomach, small intestine, large intestine, liver, gall bladder, spleen, kidneys, adrenal gland, lymph nodes, spinal cord, bone marrow, sternum, femur and tibia with associated skeletal muscles, brown fat, pinna, skin, uterus, oviduct, and ovary, and mammary gland.

# **Report Summary and Recommendation:**

Incidental lesions attributable to diet or strain background are observed in this line. We did not find morphological correlates to decreased circulating triglyceride level, decreased circulating cholesterol level, and increased susceptibility to bacterial infection.

Line summary: None
