

A scatter plot showing the relationship between 'Avg. Qual' (X-axis) and 'Count' (Y-axis). The X-axis ranges from 0 to 35, and the Y-axis ranges from 0 to 20,000. The data points are represented by '+' symbols. The plot shows a general upward trend, with a dense cluster of points between Avg. Qual values of 25 and 35, and Count values between 4,000 and 12,000. There are also several points at higher Count values (up to 20,000) for lower Avg. Qual values (between 10 and 25). A few points are marked with 'x' symbols, likely representing outliers or specific data points of interest.
