

Managing malaria

Discussion guidelines

Please follow the following guidelines when discussing your thoughts and findings in the research groups and expert groups.

- Speak for yourself and not for others.
- Allow others to finish before you speak. Listen well.
- Ask questions as well as making statements.
- Explain what you think and feel.
- Respect differences in opinion – the world would be a boring place if everyone thought the same.
- Share your life experiences and knowledge – they are valuable.
